Bachelor: Speech and Hearing Rehabilitation Science. East China Normal University

Master: Higher Education. The University of Hong Kong

PhD candidate: Vocal Therapy. The University of Hong Kong

I am currently working on vocal therapy in the lab, especially focusing on exploration of new techniques in vocal therapy and outcome assessment. By using laryngeal ultrasonography, I would like to explain and further explore the effect of whole body vibration in improving phonatory functions and vocal fatigue.

Research interests

Voice Science and Disorders; Efficacy of voice therapy; Vocal protection in treating vocal fatigue.
